

The ancestral project of the family

Nemelka

/the basic informations - 2 .part:
the causes of the deaths/

compiled for the client Gayle Nemelka from USA

by David Kohout Prague, Czech republic 10+11/2001

This project has 9 pages including this one.

Only few words about this project:

1/ The client Gayle Nemelka asked me to continue with searching the causes of the deaths of the family Nemelka - like I did in my project from 05-07/2000. Many dates and places I already knew from the client, but I needed to search the records again - to learn the causes of the deaths.

2/1 am sorry, but no cause of the death /in this project/ is the trouble of the heart.

3/ a/1 could not search the causes of the death of Caspar Rodewald and his wife Maria Elisabetha nee Lauf - the records are in Poland. b/ It is my mistake, that during my visit of the Archive in Litomerice on 10.October I did not search the death records of Joseph Watzel /died on 22.May 1812 - probably in Teplice/ and Rosalie, nee Frimbore /died on 7.November 1811 - probably in Teplice/.

I can only hope, that knowing these dates the client also knows the causes of the deaths.

c/1 did not try to find out the death records of Frantisek Wolf and his wife Katarina, nee Engel. Very probably they died in Prague, but it is only one of the possibilities, that they died in the area of the parish of St. Mikulas /where they lived cca 1800-1816/.

The alphabet registers of the church of St.Mikulas from this time are closed for public and the same situation is also in almost all other parishes in Prague.

To search all death records of St Mikulas is the work for many hours and to search death records of other parishes in Prague is the work for several days.

At the end only one foot-note

I suppose, that the client Gayle Nemelka is interesting in knowing ALL ancestors of the family Nemelka, which can be searched.

The client will remember my project of the family Wolf-Engel from 10-11 /1 996 and some more informations from Engel /+Schiffner/ project from 04+06/1997.

If the client Gayle Nemelka will be interesting, it seems to be no problem to continue with the research of Wolf-Engel family back to history.

The church records with the causes of the death:

The record No. 10: searching the cause of the death of Pauline Kostecka, nee Schiffner - which died on 3.rd July or September 1862 in Tesin, Silesia.

The town Tesin is just on the border between Poland and north-eastern part of the Czech republic. Because this area is very far for me, I asked the help of my friend-researcher, which lives in Opava, quite close to Tesin.

But the result of his work was negative:

After WW I st was town Tesin separated to two parts: 90% with all church records became the part of Poland, the small part became the part of Czech republic.

For tills reason it is not possible to search the death record of Pauline.

The record No. 11: found out on 7. November 2001 in the State district archive in Plzen, in the book No.2 of the parish Vseruby, on the page 95:

The note: the date and the place of the death I already knew from the client Gayle Nemelka - but I searched the record again to learn the cause of the death.

The cause of the death: - the fever of the nerves - .

/in german: "Nervenfleher" . f

lh-e-n.Qt£: the date of the death I knew from the client Gayle Nemelka - but did not know the parish in Prague. I had the success in the parish of St.Mikulas.

The record No. 18: The visits of the Archive of the Capitol Prague on 13. and on 20. November 2001. I tried to search the death record of Anna Schiffner, nee Wolf:

We know, that Anna Wolf was born in the area of the parish of the church of St.Mikulas in Prague and later married from the house No.267 in the same parish. In the same house on 16.2.1823 died her husband Karl Schiffner and I suppose, that in the same house were born all their children. For this reason I searched ONLY the records of the parish of St.Mikulas.

-6-

My first idea was, that Anna married again - she was the widdow with 4 children in the age of 23 years!

But I did not find her wedding record in the parish of St.Mikulas between February 1823 - December 1840.

I did not find the death record of Anna between 1856-1876 in the parish of St.Mikulas. I did not search the records before 1856, because these records do not have the alphabet registers and to search the records in the books of deaths is the work for many hours....

We know also, that Josef - the husband of Terezie -died in Kokorov on 11.March 1800.

I did not find the death record ofTerezie Nemelkova between the records of the village Kokorov between 6.February 1783 - 1843 . It seems to be quite sure, that after the death of her husband Josef Terezie moved to any unknown place.
